## About this kit...

### This project is designed for you and your child to do together!

Help your child create a colorful underwater scene inside our soft, playful fish tank. Listen to the adorable fishy friends rattle and squeak. These fun sounds will delight your child as you share lots of creative play together.

Three colors of fluorescent markers are included to color the fishy friends and the underwater scenes. These safe, non-toxic markers will wash off hands easily with soap and water, but once they are used on fabric, the color becomes permanent.

**Parents:** Cover your table with plenty of newspaper or other scrap paper to protect it from the markers. It is also a good idea to have your child wear old clothing or a smock.

**The markers will not wash out of fabric!**

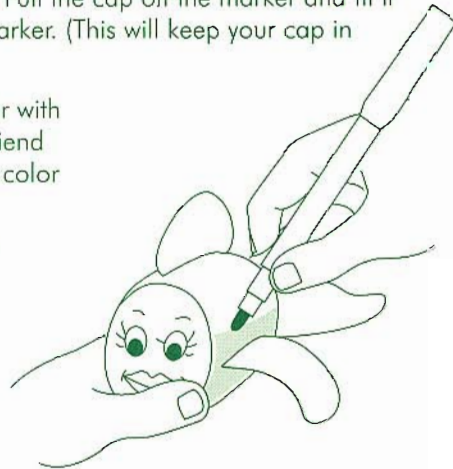

## USING THE MARKERS

1. Choose one of the markers. Pull the cap off the marker and fit it onto the other end of the marker. (This will keep your cap in place while you draw.)
2. Show your child how to color with the marker. Hold the fishy friend securely with one hand and color with your other hand.

You and your child can create designs on the fabric by drawing stripes, little flowers or hearts.

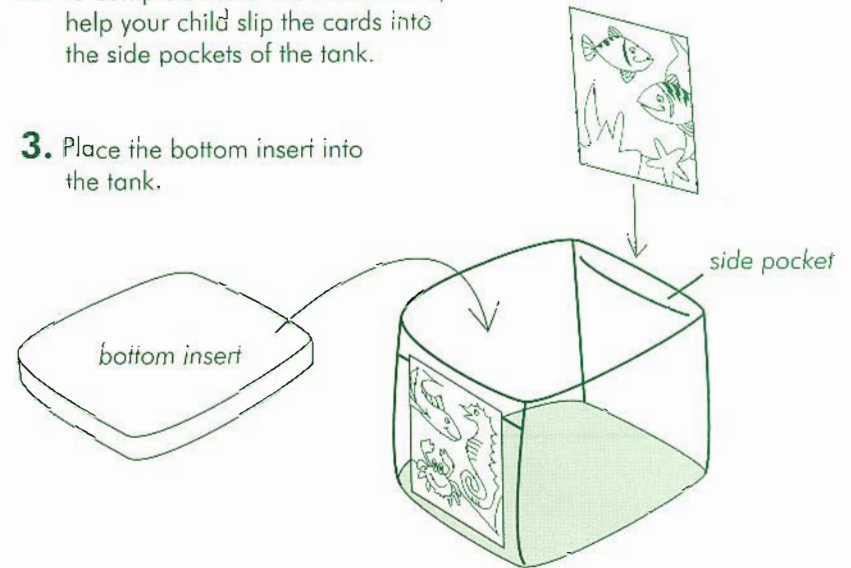

Or, cover the white fabric completely. Make your fishy friend really colorful!

**Parents:** Remember to replace the cap so that the marker does not dry out!

## CREATING THE TANK

1. There are 2 fish scenes for the soft tank that should be colored in with markers. Have your child color both front and back of each card.
2. To complete the underwater scene, help your child slip the cards into the side pockets of the tank.
3. Place the bottom insert into the tank.

**Parents:** These fishy friends will provide hours of fun for you and your child. Demonstrate all the ways you can play together. Show your child how to take the fishy friends in and out of the tank. You can both peek through the clear sides of the tank to see how many fishy friends are inside, and the squeak and rattle sounds are sure to delight your child!
